

# OpenHeart

## Providing Transparency And Accessibility To San Diego

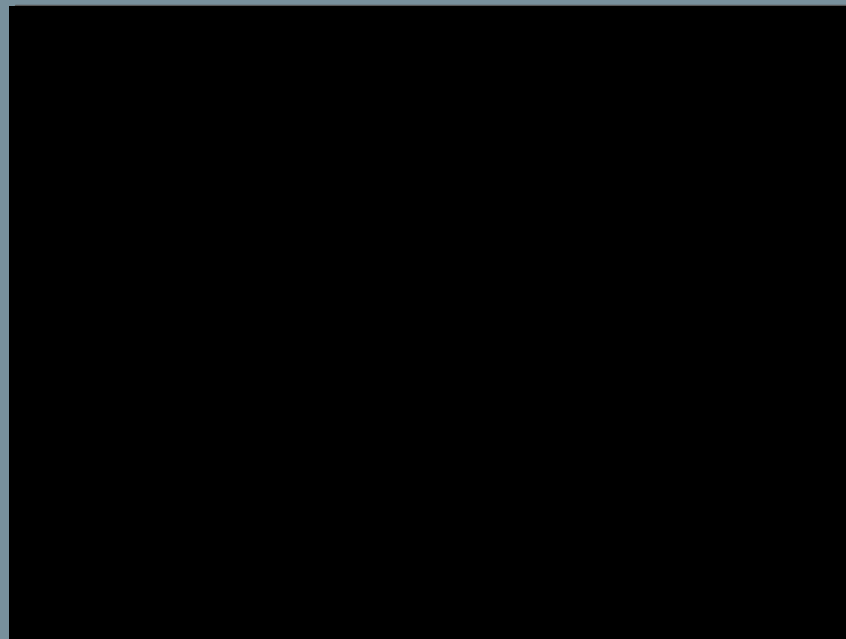

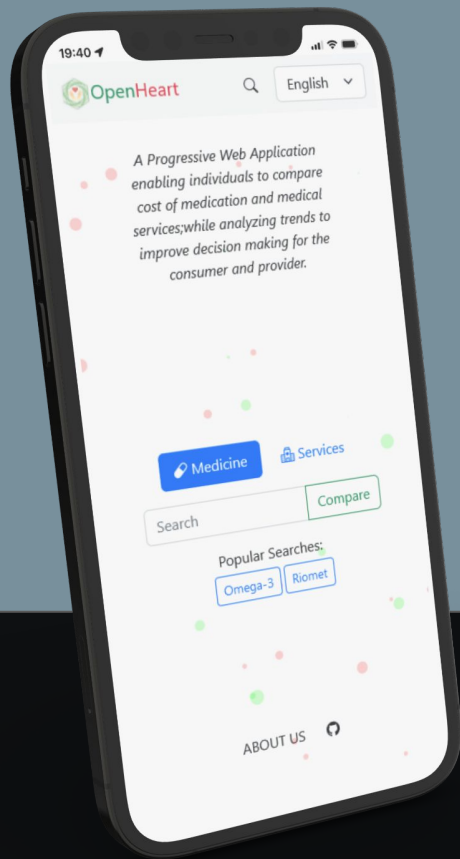

Progressive web application with an emphasis on accessibility that facilitates price comparisons of medication and medical services to the people of San Diego. Additionally allowing providers to find new health trends, so that they are better equipped to handle them.

Mobile

User Experience

Intended use for everyone, but an emphasis put on the bilingual nature of the application and its ease of use.

Data comes primarily from scraping websites, but in the future partnerships are strongly sought after to provide the price information, in exchange for information on trends.
